

Ogasayama Sports Park
ECOPA STADIUM / ECOPA ARENA

Welcome to ECOPA.

ECOPA

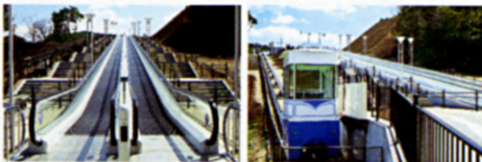

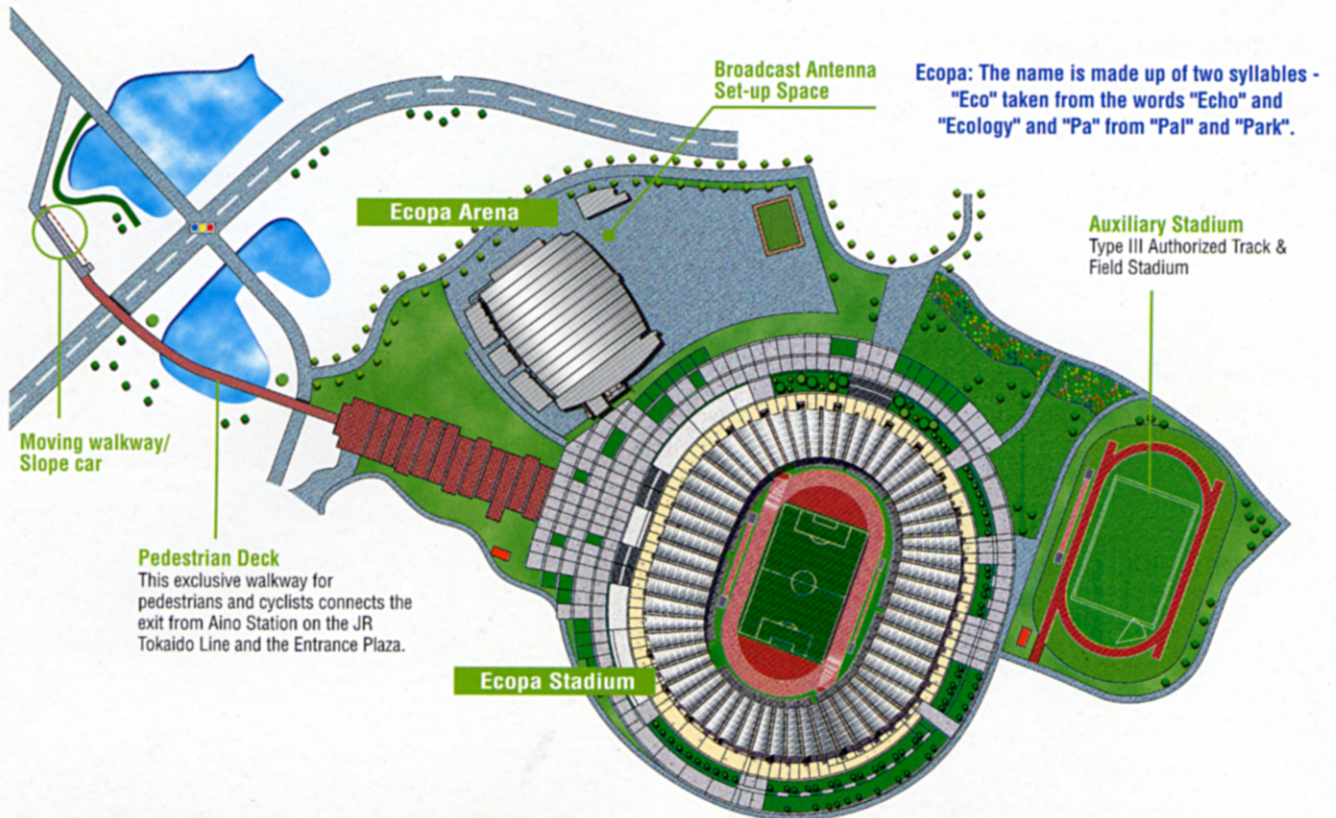

Worldwide excitement starts here.

The Ecopa Stadium & Arena is located in the center of Japan, surrounded by the mountains of Ogasayama in Shizuoka Prefecture.

The scale of the complex and the facilities it offers cater to the internationalization and information-orientation of sports and other events, drawing out the best in competitors and spectators alike.

All visitors enjoy the privilege of experiencing the excitement of uniting as one.

Separate pathways for spectators and players/authorized personnel. Smooth, safe entry for big events.

The Pedestrian Deck, a walkway and cycle path, keeps spectators away from motorized traffic. Moving walkways and 'slope cars' (mini monorails) offer a comfortable ride up the slopes.

An underground passage offers VIP guests access to the basement level of the Stadium, from where an exclusive elevator takes them up to the VIP lounge. VIP guests are also provided smooth access to the Arena from the adjacent car park.

Players are offered safe access to the Stadium and Arena via a separate entrance.

The parking area accommodates 3,117 cars and 137 buses, 3,254 vehicles in total. In addition, the auxiliary parking area accommodates 1,120 vehicles.

UNIVERSAL DESIGN

A universal design with space everyone can enjoy

- The complex walkways are designed in accordance with 'heart-building' standards, and Shizuoka welfare town-planning bylaws.
- Moving walkways and 'slope cars' located at steep inclines near the park entrance.
- All steps have been made into ramps on the main walkways within the park and studded paving blocks have been laid to aid the visually impaired.
- All signs are colored in a simple comprehensible design and are accompanied by Braille maps and voice guidance.
- 34 'family' toilets are located in the Stadium, 9 in the Arena.
- 296 wheelchair seats are located in the Stadium, 42 in the Arena.
- In the event of an evacuation, announcements will be made in Japanese and English, and instructions will be displayed on the big screen.
- All elevators conform to a universal design.

ECOLOGY

Active implementation of efficient resource and energy use.

Rainwater is used for watering the fields, and for toilet water. Inside the Arena, ice thermal storage facilitated by midnight power is used for air conditioning, and a solar-heating system is used for hot water.

The all-weather excitement space seating 50,000 for soccer, track

The two-tier theater-like stand offers comfortable viewing

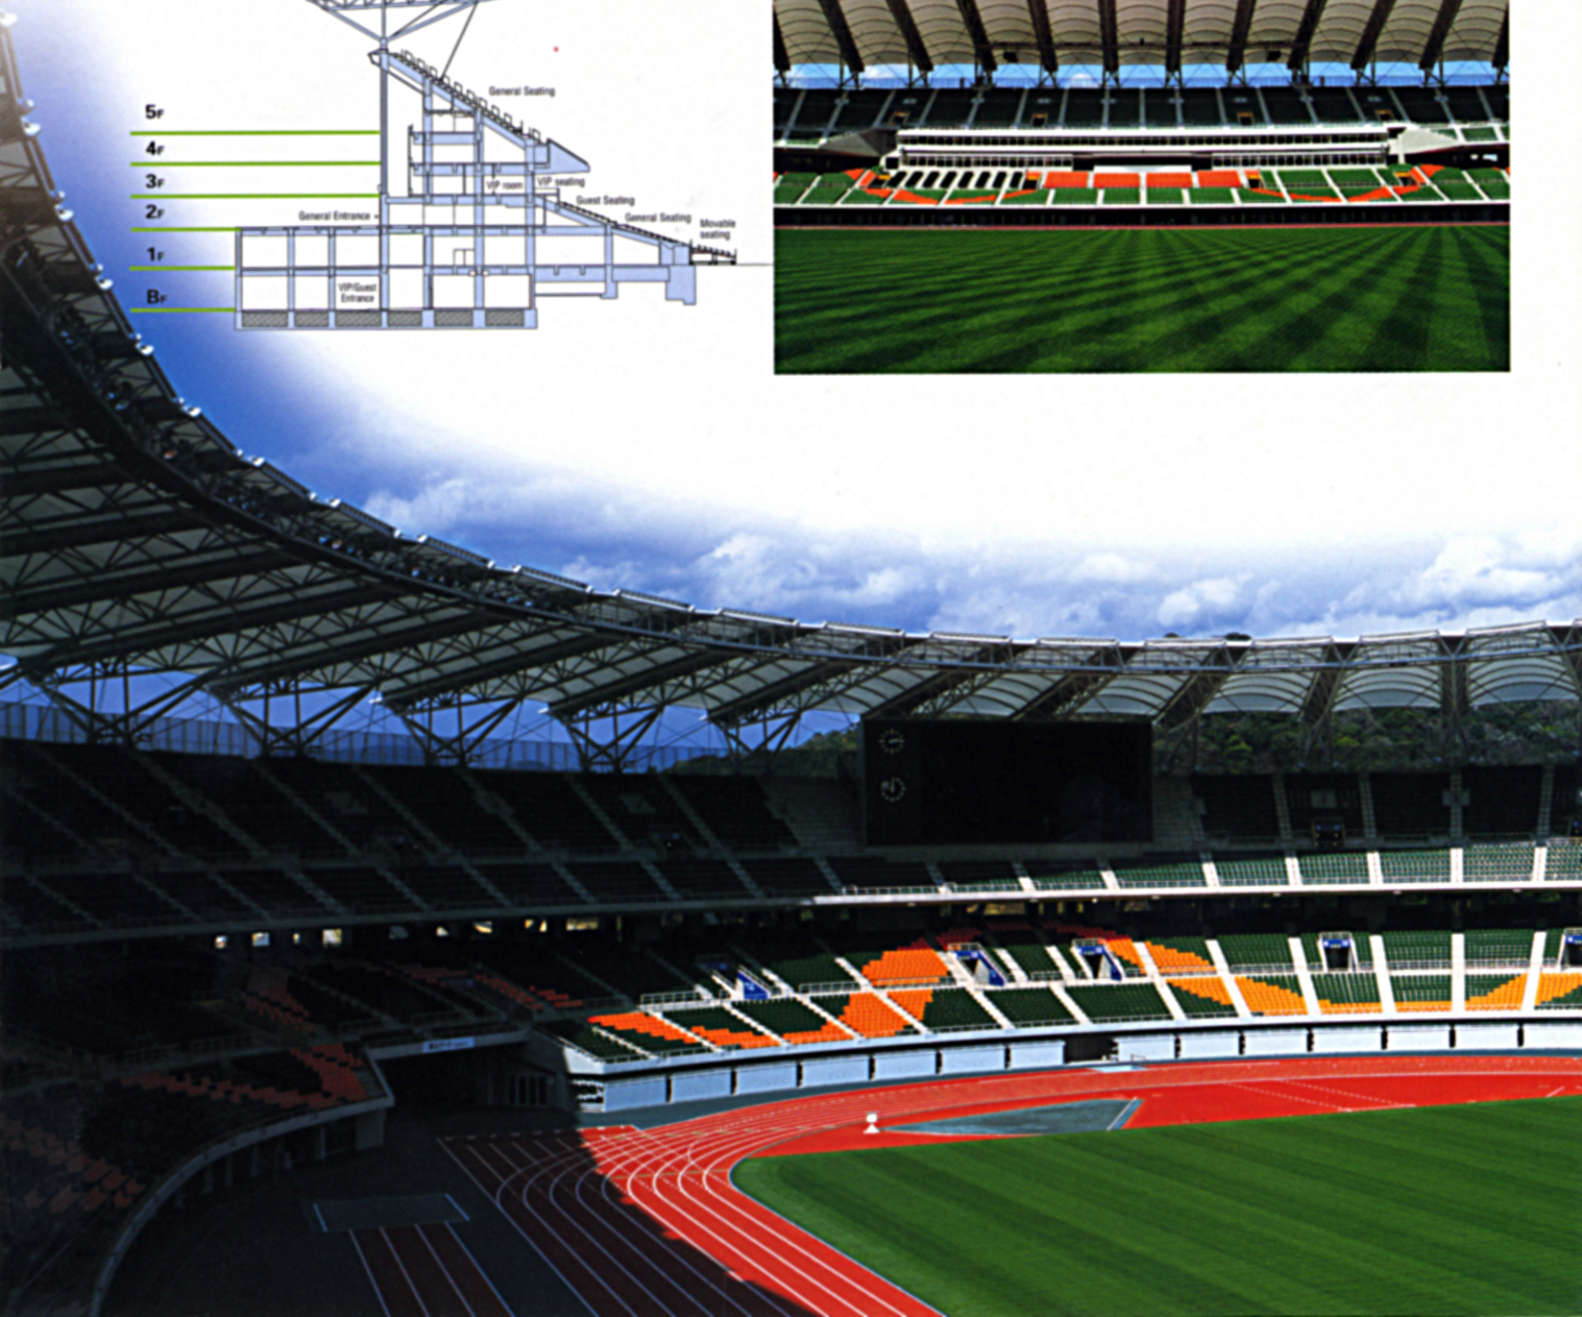

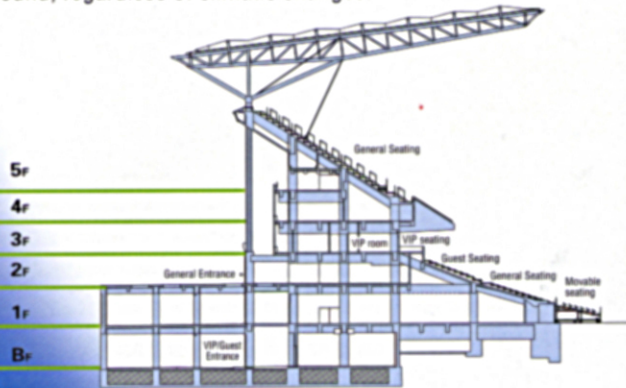

The stand spans the 1st and 2nd flows with a two-tier theater-like construction. The 51,349 fixed seats have backrests and are set on an incline ideal for spectator viewing.

A giant canopy shields the stand from the elements

The delicately designed canopy completely covers the spectator stand ensuring your comfortable viewing.

Gleaming natural lawn field stays green in all seasons

5 strains of 3 natural grass types cover the 100m x 75 m playing fields. The lawn stays in optimum condition all year round, regardless of climatic changes.

Track & field, or grand entertainment spectacles.

Movable stand - for watching action close-up!

Moveable stands with 5,236 seats are located in front of the main, back and side stands. Movable seats slide out putting you right in front of the action when watching games such as soccer.

Powerful 19.2m x 9.6m Mega-screens

Two 184.32m² full-color LED screens (using pure green components) that also work as scoreboards are located at the top of the side stands. These screens add to the excitement by providing live and slow-motion coverage as well as replays. They also play a vital role in providing information for guests with impaired hearing.

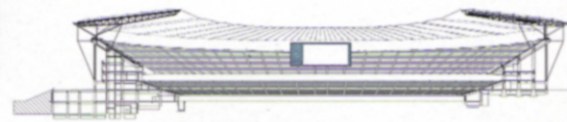

Lighting and Sound that Create Impressive Presentation with Exceptional Controllability

The lighting system offers 4 set levels of luminance, including 1500lx output appropriate for TV coverage. Controllable relay time of directivity-enhanced speakers offers clear sound. Whether used for sports such as soccer and track & field, or for an event or concert, this system guarantees a spectacular presentation.

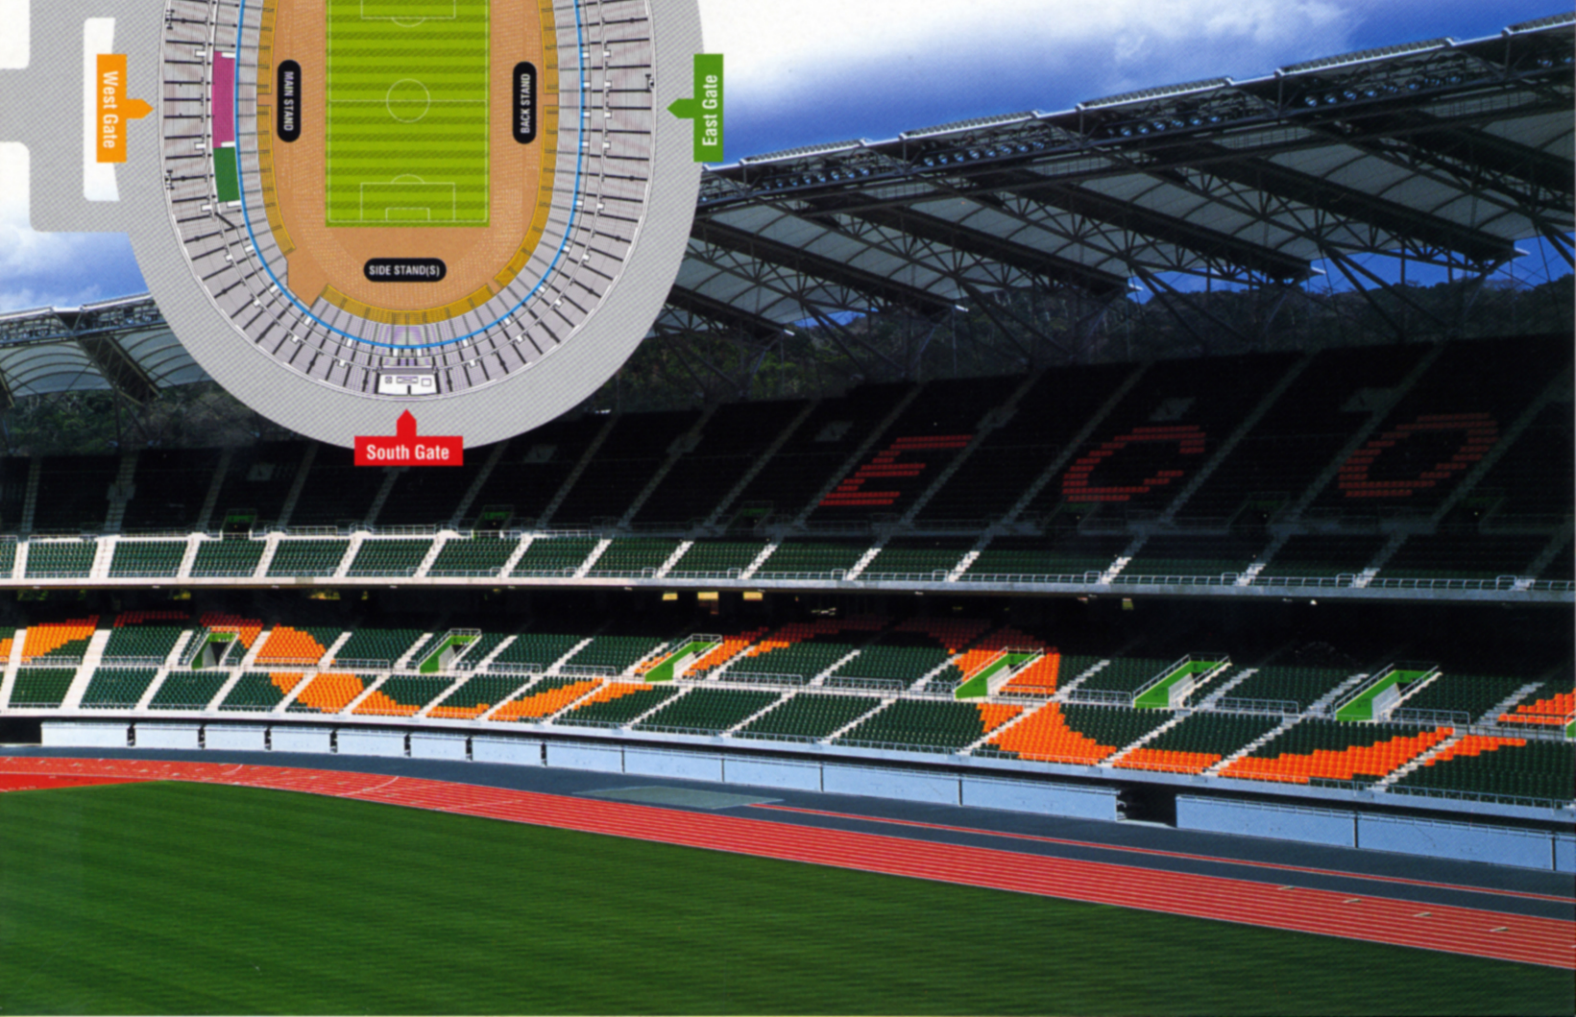

Outline of Ecopa Stadium

- Built: 26th March 2001
- Building Area: 31,777m²
- Floor Area: 83,278m²
- Scale: Below ground floor to 6F (Highest point: 43m above ground level)
- Structure: steel framed reinforced concrete; reinforced concrete and precast concrete
- Canopy structure: Teflon sheet (covers all fixed seating)

- VIP seating
- Press seating
- Wheelchair seating
- Movable seating

The center with interchangeable layout for 10,000 participants of v

Multipurpose center for sports, concerts, and exhibitions

The layout of the Arena's vast 4,165m² floor can be adapted for a variety of activities: basketball; volleyball; tennis; handball; badminton; table tennis; gymnastics; indoor athletics; concerts; lectures, and even sumo wrestling. The Center can also be used in conjunction with the Stadium for large events.

Handles a capacity of 10,000 with the addition of movable and auxiliary seating

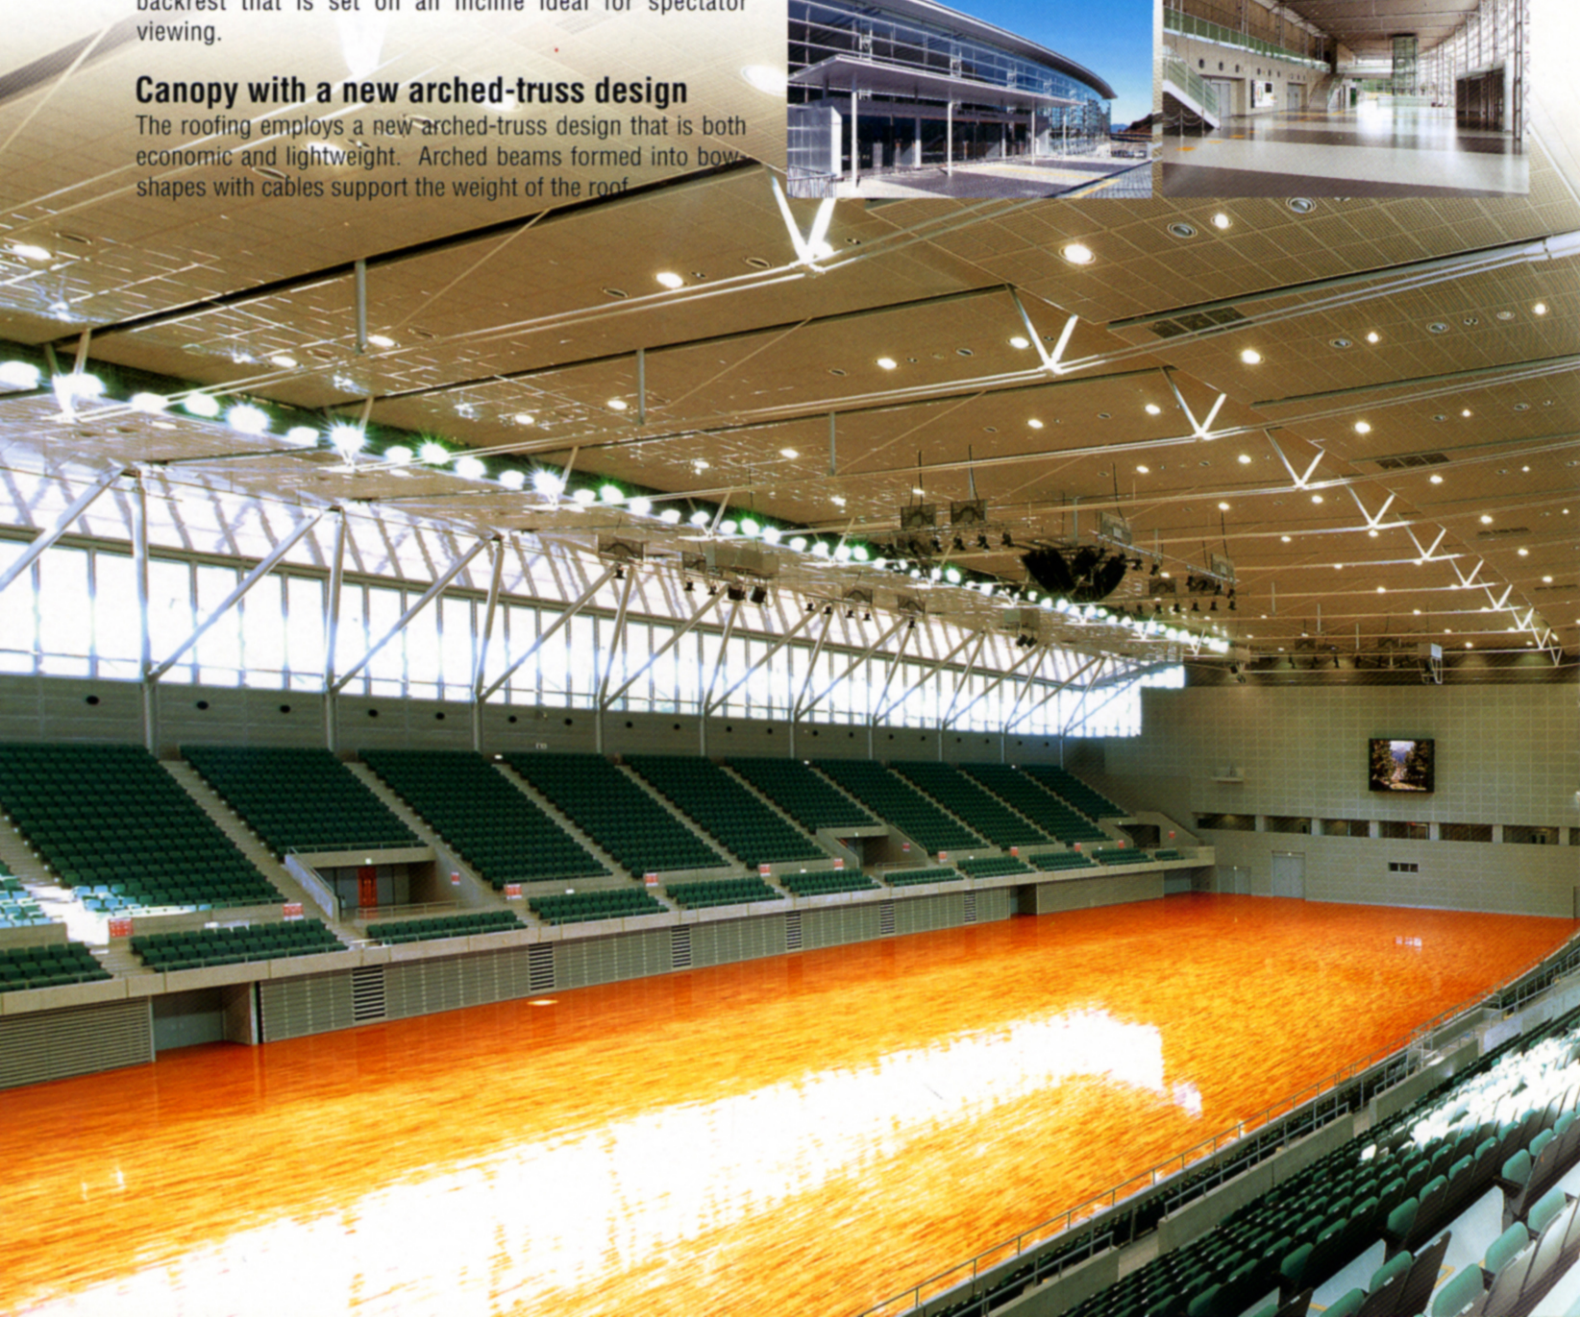

The Arena can handle a capacity of 10,000 with the addition of 1,440 movable and auxiliary seats to the 4,862 fixed seats. Seating layout can be arranged to best suit the event.

Comfortable fixed seats with backrests

Spectators can enjoy the comfort of fixed seating with a backrest that is set on an incline ideal for spectator viewing.

Canopy with a new arched-truss design

The roofing employs a new arched-truss design that is both economic and lightweight. Arched beams formed into bow shapes with cables support the weight of the roof.

Various indoor sports, music, and cultural events.

A giant versatile screen portrays the passion and excitement

Giant 6.08m x 4.48m full-color LED screens (using pure green components) which can double as scoreboards add to the excitement by providing live and slow-motion coverage as well as replays. They also play a vital role in providing information for guests with impaired hearing.

Sophisticated lighting capabilities for both competition and presentation

- 19 patterns for playing area lighting including 1500lx output appropriate for TV coverage.
- All windows are equipped with fully-controllable motorized curtains capable of shutting out 100% of external light.

Motorized Roll Curtain (fully open)

Motorized Roll Curtain (fully closed)

Natural and clear sound quality

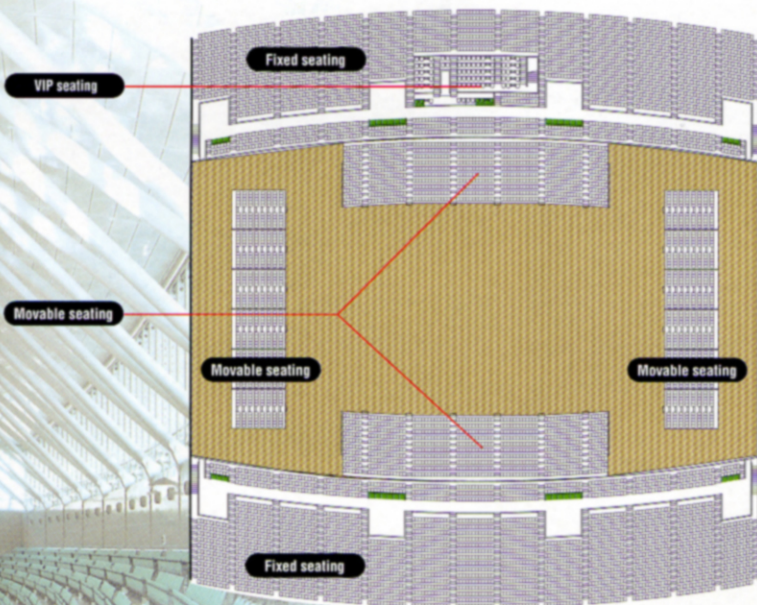

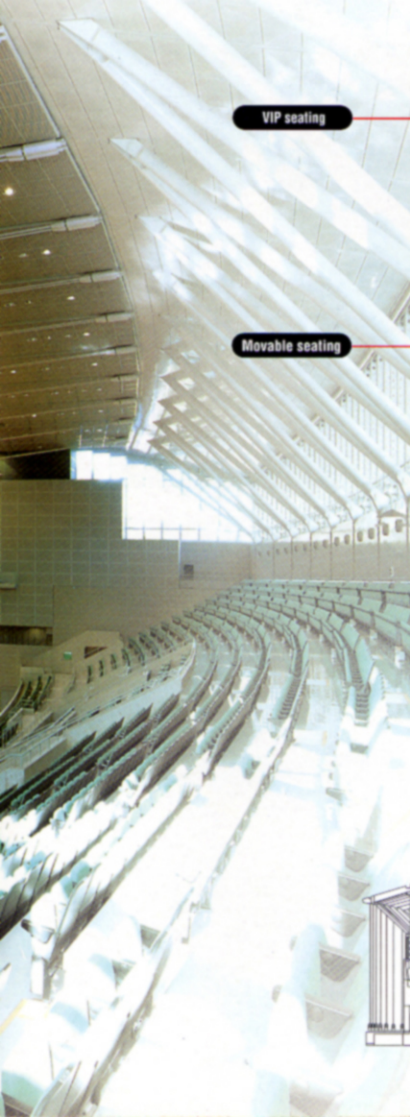

- Reverberating time equivalent to conference room conditions (1.6 seconds)
- High directivity speakers placed in a multitude of locations.
- Satellite speakers also fully equipped.
- Concert and conference settings for stage speakers.
- Relay time control on the specialized digital processor produces natural, clear sound quality.

An air conditioning system that minimizes the effects of air currents.

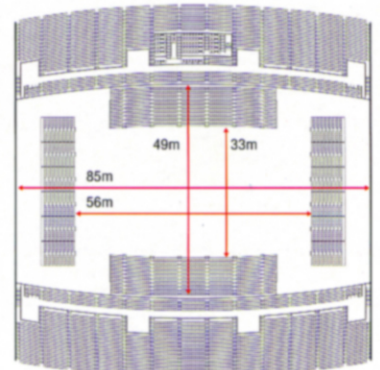

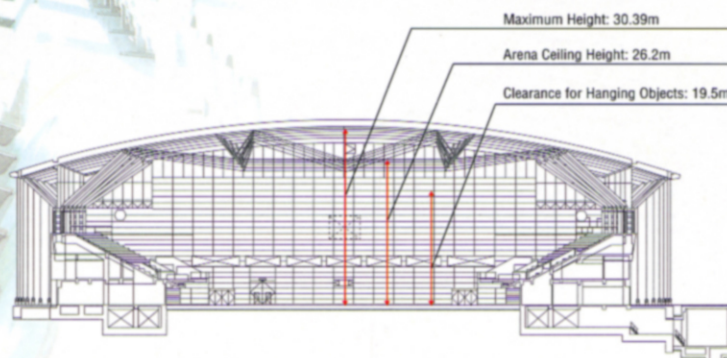

For games such as badminton that are adversely affected by air currents, wind output can be switched off in the floor area to provide for a fair and exciting match.

Outline of Ecopa Arena

- Built: 14th December 2001
- Building Area: 12,818m²
- Floor Area: 22,581m²
- Scale: 5 story structure (Maximum height: 30.39m; Ceiling height: 26.2m; Clearance for hanging objects: 19.5m)
- Arena floor space: 4,165m² (85m x 49m)
- Structure: Reinforced concrete; steel framed reinforced concrete and steel frame.
- Canopy Architecture: Arched truss design
- Capacity: Up to 10,000.
 - Fixed Seating: 4,862 (Regular: 4,736; VIP: 84 and Wheelchair: 42)
